Abstract (Article Summary)

SAN FRANCISCO, BEA USERS CONFERENCE, Feb. 22 /PRNewswire/ -- ⓒBEA Systems, Inc. (Nasdaq: BEAS), The E-Commerce Transactions Company(TM), today announced that Red Gorilla, The Application Syndication Company, has built its pure Java, Web-based time tracking and invoicing application for professional consultants on BEA WebLogic Server(TM). Gorilla Time, launched in early February 2000, is the first time tracking and invoicing offering of its kind, providing access on all three mobile interfaces -- Web, phone and Palm(TM).

Red Gorilla is initially targeting the 28 million legal, creative, and IT consultants, freelancers and small businesses in the U.S. that manage time as a resource, as well as the millions more beyond U.S. borders. Red Gorilla's Gorilla Time offering fills a void for professional consultants, who historically, have spent countless time and paper tracking hours and mailing invoices, or wrestling with spreadsheets, losing otherwise billable time. Now these consultants can ease their record-keeping chores by using a Web browser, personal digital assistant (PDA), or cell phone, anytime and anywhere, to enter their time and expense data, manage their invoices, and, in short, run most aspects of their businesses.

BEA WebLogic Server is part of The BEA E-Commerce Transaction Platform(TM), which provides the foundation for building highly reliable e-commerce systems. In addition to BEA WebLogic Server, BEA WebLogic Enterprise (TM), and BEA Tuxedo(R) -- e-commerce transaction servers for rapidly building, deploying, and managing e-commerce applications -- the BEA E-Commerce Transaction Platform includes: BEA eLink(TM) for integrating new Web applications in real time with back-office systems and with other businesses across the Web; components that enable business logic to be snapped together into applications within a matter of weeks; and a wide range of education, customer support, and professional services to help small companies and large corporations get e-commerce initiatives off the ground and up on the Web.

Full Text (918 words)

Hot Business Model of B2B 'Application Syndication' Enables Portals to Offer

Red Gorilla's Services Under Their Own Brands

h   e   c   eb   e   ch   e

SAN FRANCISCO, BEA USERS CONFERENCE, Feb. 22 /PRNewswire/ -- ⊛BEA Systems, Inc. (Nasdaq: BEAS), The E-Commerce Transactions Company(TM), today announced that Red Gorilla, The Application Syndication Company, has built its pure Java, Web-based time tracking and invoicing application for professional consultants on BEA WebLogic Server(TM). Gorilla Time, launched in early February 2000, is the first time tracking and invoicing offering of its kind, providing access on all three mobile interfaces -- Web, phone and Palm(TM).

Red Gorilla is initially targeting the 28 million legal, creative, and IT consultants, freelancers and small businesses in the U.S. that manage time as a resource, as well as the millions more beyond U.S. borders. Red Gorilla's Gorilla Time offering fills a void for professional consultants, who historically, have spent countless time and paper tracking hours and mailing invoices, or wrestling with spreadsheets, losing otherwise billable time. Now these consultants can ease their record-keeping chores by using a Web browser, personal digital assistant (PDA), or cell phone, anytime and anywhere, to enter their time and expense data, manage their invoices, and, in short, run most aspects of their businesses.

Red Gorilla provides a free Web-based service as well as premium services that are offered to customers primarily through a syndication model. This hot new trend enables portal sites to instantaneously enhance their properties with easily-deployed, high- utility, revenue generating applications.

The application syndication trend is being fueled by the growing acceptance of Extensible Markup Language (XML) as a means for automating the business rules and processes involved in distributing dynamic Internet applications and content. XML is an independent standard, and information stored in this language can be easily read by other systems that need the data to run and track business processes across the Web.

The pureJava architecture, of Red Gorilla's applications, is well suited to handle heavy traffic in XML as well as Extensible Style Sheet Language (XSL). And BEA WebLogic Server, with the most comprehensive implementation of Enterprise Java (J2EE) standards available in an application server, was the natural choice for Java- minded Red Gorilla.

"We needed to be able to scale immediately to hundreds of thousands -- potentially millions -- of customers. And, having chosen Java and Enterprise JavaBeans (EJB) for our application architecture, we needed an application server that delivers the high performance our e-generation customers expect," said Ariel Kleckner, founder and president of Red Gorilla. "In a world of contending standards, we very much appreciate the rigorous support BEA WebLogic Server provides for the latest EJB spec. The inherent scalability and failover capabilities of the server's clustering support ensures that our service will be available to customers, no matter how many engage it at any moment, from the multiple sites of our numerous partners."

"The e-generation expects that every complex, behind-the-scenes transaction be invisible and lightning fast," said Joe Menard, president of the BEA E-Commerce Server Division. "They demand that Web services be available at all times, without fail, be easy-to-use and perfectly reliable, and be personalized for their particular needs. This is why BEA WebLogic Server was the best solution for Red Gorilla."

BEA WebLogic Server is part of The BEA E-Commerce Transaction Platform(TM), which provides the foundation for building highly reliable e-commerce systems. In addition to BEA WebLogic Server, BEA WebLogic Enterprise (TM), and BEA Tuxedo(R) -- e-commerce transaction servers for rapidly building, deploying, and managing e-commerce applications -- the BEA E-Commerce Transaction Platform includes: BEA eLink(TM) for integrating new Web applications in real time with back-office systems and with other businesses across the Web; components that enable business logic to be snapped together into applications within a matter of weeks; and a wide range of education, customer support, and professional services to help small companies and large corporations get e-commerce initiatives off the ground and up on the Web.

About Red Gorilla(TM)

Red Gorilla syndicates Web-based, wireless, end-user applications to highly trafficked Web properties including portals, online publications, vertical portals and ISPs. The company's commitment to a private-label product enables its partners to instantaneously enhance their properties with easily deployed, high-utility, revenue generating applications. Red Gorilla, a privately held company, was founded in 1999 and is based in San Francisco, California.

⊛BEA Systems, Inc.

BEA Systems, Inc. is The E-Commerce Transactions Company powering many of the world's most innovative companies that serve the "e- generation", companies such as Amazon.com, Federal Express, E*TRADE, United Airlines, DIRECTV, Qwest, Nokia, and Kaiser-Permanente. The e- generation relies on the Web to conduct their everyday business, demanding richer, more personalized experiences and the guarantee that your Web site is always available -- every minute of every day. BEA's award-winning E-Commerce Transaction Platform, coupled with BEA consulting, education, and support services, helps companies launch reliable e-commerce initiatives quickly. BEA solutions help companies of all sizes build e-commerce infrastructures that leverage existing investments and provide the foundation for running a successful integrated e-business for the e-generation. BEA has more than 50 offices in 24 countries, is headquartered in San Jose, Calif., and is on the Web at www.bea.com

NOTE: BEA and BEA Tuxedo are registered trademarks of BEA Systems, Inc. BEA WebLogic Server, BEA WebLogic Enterprise, BEA eLink, The E-Commerce Transactions Company, and The BEA E-Commerce Transaction Platform are trademarks of BEA Systems, Inc. All other company and product names may be trademarks of the company with which they are associated SOURCE BEA Systems Inc.

Abstract:
SO much for plain speaking Kerrymen.

Full Text:
Copyright Irish Times Ltd. May 17, 1996

SO much for plain speaking Kerrymen. The Margin's latest mouthful award is won by a line from a brochure describing the wonders of Killorglin based foreign exchange group Fexco's new ⌀Unisys computer system. "The new Unisys SMP61000 server, particularly when equipped with 200 MHz Pentium Pro processors and the ⌀Unisys engineered 533MB/s Synchronous Coherent Memory (SCM) system bus, will be a system to reckon with." It's obvious really. Isn't it?

[Save Link] Saves this search as a Durable Link under "Results-Marked List"

Your search did not find any articles. These tips can help:

- Verify the correct spelling of your search terms.
- If you're searching "Citations and Abstracts", try the same search in "Article text".
- If you're searching only one or two collections, use Change Collection to add another or search ALL available collections.
- Remove any limit to Full text articles or Peer reviewed.
- If you're using Basic or Guided Search, don't enter a question or long sentence. Instead, use the AND operator to link important words of the sentence together. For example, instead of *What is the largest continent on Earth?*, search for *largest AND continent AND earth*.
- Use Natural Language Search to enter a question in everyday English.
- Use the Topic Search to find articles relevant to what you are looking for.

Refine your search. Enter a word, words or specific phrase.

General

Q. What is Gorilla Time™ and who should use it?

Q. Is Gorilla Web really free?

Q. I'm already using Quickbooks to track my time and expenses. Why should I switch?

Q. What are the advantages of being able to access my account from anywhere?

Q. Does Gorilla Time work with all cell phones and Palms?

Q. Can I distribute invoices without stuffing envelopes?

Q. Do I need to understand accounting to use Gorilla Time?

Q. Is it easy to track mileage and other expenses?

Q. If I choose a premium service, how do I pay?

Q. What is Red Gorilla and what is Gorilla Time?

Q. How does Red Gorilla make money?

Q. What is Gorilla Time and who should use it?

A. We designed Gorilla Time for professionals who need a simple, fast billing solution that doesn't require expensive software and constant upgrades. With Gorilla Time, a web browser and computer are all you need to track time and expenses and produce professional invoices. Because it's Web-based, you can access your records from anywhere, any time, via cell phone, Palm™ or any Web browser. Invoicing is as simple as clicking "send" for delivery by e-mail, fax, regular, certified or express mail. Our goal is to reduce your administrative burden and enhance your productivity so you can focus on generating revenue.

Gorilla Time is for small professional service firms, independent consultants, freelancers, and moonlighters

h   eb ch e g eb   e g   c   b   f   e h

who provide services to clients on a time and materials or project basis. Computer consultants, designers, graphic artists, copywriters, lawyers, accountants and financial planners can all use Gorilla Time.

▲

Q. Is Gorilla Web really free?

A. Yes, Gorilla Web is free for an unlimited number of users. Gorilla Web includes our complete time and expense tracking service, plus easy invoice management and reporting, and unlimited e-mail invoicing at the click of a button. Whether your Gorilla Web account has one or multiple users, it's always free.

In addition to Gorilla Web, we also offer premium wireless and additional delivery options for a small monthly fee. Our invoicing service is called Gorilla Biller. Our wireless service, Gorilla Go Pack costs $9.95/month and gives you access to your account by cell phone or Palm™. Unlimited e-mail invoicing is free with Gorilla Web, or you can pay just $4.95 a month for Gorilla Biller for invoice delivery by fax, regular, certified or express mail.

▲

Q. I'm already using Quickbooks to track my time and expenses. Why should I switch?

A. With Quickbooks, you can only track your time and expenses when you are sitting at your computer. With Gorilla Time, you can access your records from anywhere. Since Gorilla Time is designed specifically for time tracking and invoicing, it's easy to use and doesn't require any knowledge of accounting.

▲

Q. What are the advantages of being able to access my account from anywhere?

A. Keeping track of time and expenses is a hassle. The tendency is to leave it all to the last minute and "guestimate" from memory or to keep notes on scraps of paper. Precious billable time and expenses get lost in the process, resulting in you undercharging for services. Gorilla Time is designed to make sure this doesn't

h   eb ch e g eb   e g   c   b   f   e h

happen. It's easy to update your records while sitting in traffic or standing in line via cell phone or Palm, or from any computer with a Web browser. Not only will you save time, but you'll see your profits rise.

Q. Does Gorilla Time work with all cell phones and Palms?

A. It works with any telephone or cell phone, and all handheld computing devices compatible with 3Com's Palm™ Computing platform.

Q. Can I distribute my invoices without stuffing envelopes?

A. Yes, plus you can avoid frantic last-minute trips to the post office. After you've edited and reviewed your invoices, just click send to deliver them electronically via e-mail. Unlimited e-mail invoicing is free with Gorilla Web. Or choose our Gorilla Biller service to instantly send your invoices by fax, regular, certified or express mail.

Q. Do you need to understand accounting to use Gorilla Time?

A. No, unlike Quickbooks, Excel and other financial software packages, Gorilla Time handles the accounting for you. You simply enter your time and expenses, and Gorilla Time generates all the invoices and financial reports you need to run your business.

Q. Is it easy to track mileage and other expenses?

A. Very. You can use the same simple form to track both your time *and* expenses for every client. Enter the amount, jot a note and you're done. Your expenses will automatically be added into the invoice. Or use your Palm™or cell phone to quickly enter your meal expense amount while still in the restaurant.

Gorilla Time uses the Palm interface (available through

h   eb   ch e g eb   e g   c   b   f   e h

Gorilla GoPack) to track mileage. Just enter your starting and ending odometer reading and the Mileage Calculator will automatically invoice the miles at your client's mileage rate. It's that easy.

All our expense tracking features are included in Gorilla Web.

▲

Q. If I choose a premium service, how do I pay?

A. We accept Visa or MasterCard.

▲

Q. What is Red Gorilla and what is Gorilla Time?

A. Red Gorilla is the Internet Application Company^{sm} that created Gorilla Time. Red Gorilla makes Web-based tools and wireless applications to help you run your business and Gorilla Time is our first product. See About Us.

▲

Q. How does Red Gorilla make money?

A. Our core service, Gorilla Web, is absolutely free. We make money on advertising. In addition, we charge a small monthly fee for our premium wireless and invoicing services, which are optional. Our wireless service is called Gorilla Go Pack™. Our invoicing service is called Gorilla Biller™.
